PRODUCTS ON WHICH THE PROCEDURE IS APPLIED

- Red Power XL™
- Red Power 29” XL™

1. Take out the KIT.
2. Remove the end cap of the hub from the side of the disk brake.
3. Insert the adapter with shortest length on the disk brake side.

4. Rotate the hub from the opposite side.
5. Remove the end cap of the hub from the side of the sprocket holder body.
6. Remove the seal from the cap by pressing on two points at the same time.

7. Check that the seal is in good condition.
8. Insert the seal on the adapter with the longest length. The black shielded part faces towards the inside of the hub body.
9. Fit the adapter on the hub axle.
